

## How To Install a Cork Wall

Using Cork Rolls or Cork Sheets to Design a Cork Wall & Tacking area Tools & Materials Needed For A Professional Installation:

- Sharp Utility Knife, Carpet or Linoleum Blade
- Adhesive ? recommended Henry Brand #356 or #176 (or comparable vinyl adhesive)
  
- Carefully follow adhesive manufacturer installation instructions available online at: [www.henry.com](http://www.henry.com)
  
- 3/16" x 5/32" V-Notched Trowel
- Hammer
- Brads/Headless Nails

All materials needed, including adhesive, available at True Value, Do It Best or your local hardware store. HENRY BRAND adhesives are available for on-line purchase at [www.truevalue.com](http://www.truevalue.com) , [www.doitbest.com](http://www.doitbest.com) or [www.acehardware.com](http://www.acehardware.com)

### Step By Step Instructions

#### 1) Preparation:

For ease of installation, unwind cork, pre-cut ? invert pieces & place weight(s) to flatten. Be sure wall is clean, dry and that the existing surface is secure.

#### 2) Cutting:

The cork can be trimmed with a utility knife, carpet or linoleum blade. It may require more than one pass.

#### 3) Adhesive:

We recommend Henry Brand #356 or #176 applied with a v-notched trowel. Apply 100% adhesive coverage to the wall surface.

#### 4) Installation:

After careful application of adhesive, lightly position the cork sheet\*, and press firmly in place (rolling is recommended). Use brads/headless nails in all corners and areas that may not adhere.

#### 5) Finishing:

Cork is a wood product and can be stained, painted or varnished. We suggest you test on spare piece first. For the perfect built-in bulletin board, you may tack picture frame molding around the cork.

#### <h4>The perfect wall:

Cork wall covering does not show scratches, dents or nail holes. Ideal pin-up area. Absorbs unwanted noises. Easy to maintain. Use fine sandpaper to remove any unwanted marks.

\*FOR EASE OF INSTALLATION, we recommend gluing side identified with label on cork roll, to your wall or substrate.
